County Commissioners Office,
Vinton County, Ohio,

General W. Monday, August 2nd, 1887.

The Board of County Commissioners, met this day pursuant to adjournment. Present: Wines, Ethely Baldwin, and Water.

Resolution of the Board, Perpetuating the Matter of Extending the County Board.

The matter of the Presenting of the proposed ordinance to the matter referred to him for consideration. Motion to the Board at the last meeting was to-day received and read, as follows:

To the County Commissioners, Gentlemen:

In answering the foregoing questions, respectfully submit:

The Local and School Law (3095 Ohio Statute, amended April 28th, 1885, act 43, page 84, Ohio Law), does not give the County Commissioners the power to lay a special tax to raise the money, and it cannot exist by mere implication.

Second: The cost and expense of providing and maintaining such a sum, and in the case of the General County Board, and the Commissioners, in making their report for such general County purposes, should take into account the probable costs and expenses of the additional burden, and make such levy accordingly.

Third: The General County Commissioners have neither the power nor the authority, under any statute, or otherwise, that I am aware of, to levy for the period of ninety-nine years, another or another for the purposes of the General County Fund, nor have they the right to anticipate the payment of such sums out of such funds, by the ensuing County Board, therefor.

The General County Fund is provided for the payment of the incidental
expenditure of the administration of local government...not otherwise specially provided for, and I propose that the Commissioners, in the use of such fund for such purposes, may exercise a broad discretion, but I think that, as a matter of fairness and justice, they should not favor any one interest of the County to the entire injury of another or the public interest; and in the exercise of the taxing power conferred, they should be controlled by reasonable uniform and proportionate interests of the County entailed of necessity and at the same time help the rate of taxation as low as practicable.

J. T. Power,
Presiding Attorney.

The Commissioners therefore said that the said subject be entered on the general minutes of the Board, and that the original be filed with the Commissioners' papers.

John T. Power, as a committee appointed to the Board on the 7th ultimo, reported to the Board in the matter of furnishing a suitable hall or room on the first or ground floor in the city of Jamestown, for the purpose of providing a room for the use of the companies of the Ohio National Guard organized in the city and county, as required to be done and required by Section 385 of the United States of Ohio, as amended April 28, 1846, presented to the Board a printed article of agreement signed by John D. Ford, chair of the board, upon which the building known as the Seventh Street Hotel in the city of Jamestown, is situated, and signed by John D. Ford and J. T. Gardner as the�

The sale shall include buildings and lot of ground, for the term and willing, for the length of three years from the 1st day of August, 1866, to the Board of County Commissioners for Washington County, the said building and lot of ground, to be paid during said period for the purchase at the amount due on said room or rooms by the Ohio National Guard, in consideration of the payment to the Board, of the sum of three hundred dollars in equal monthly...
August 2nd, 1836.

In accordance with the provisions of said lease, the lessee agrees to pay the sum of two hundred and fifty dollars per year in quarterly installments. It is further provided that at the termination of said lease, the lessee shall have the right to remove from said premises and all improvements, additions, fixtures and appliances made by or placed in, at or about said premises by the said lessee during the time stated in said lease.

Upon due consideration, the said Board of County Commissioners, after due deliberation and signed said lease unanimously.

Agreed.

Messrs. Bethel, Calvin and Martin.

Proposed Legislation for Joint Work House and Co. Railway

The Board considered and approved a bill prepared by the
Chief Executive Officer, Mr. O'Neill, presenting a conference
with the City Solicitor and the Board of
Joint Work House Directors for introduction
by State Senator Hon. John O'Neill in the Ohio
General Assembly, for the purpose of obtaining
legislation to provide for the maintenance and
management of Joint City and County Work
Houses, whereas the statutes are now deficient.

The Board also met Senator O'Neill and conferred
with him in advance of the same, requesting
that he urge upon the Legislature the necessity
of the passage of such an measure for
the proper government of the Joint Work House
in this city.

The Board conferred with Senator
O'Neill also concerning the full and final
action in the Legislature of authorizing the County
Commissioners to sell the Muskingum County
Railway, and certain amendments to the same
previously presented to the January
Board of Trade, more particularly the proposed limitation of the
amount of revenue which shall be the minimum
for which the said Railway may be sold. This
proposed minimum being $189,000, the Board
of County Commissioners, upon consideration
of the same, were unanimously of the opinion
that the said proposed amendment and limitation
would result in defeating the proposed
sale. The Board of County Commissioners
therefore expressed to Senator O'Neill their
objection to the said proposed amendment.

Hearing Committee of Monumental Association.

According to appointment, the Board today heard at length the recommendations of a committee of the Soldiers and Sailors Monumental Association of Muskingum County in support of the proposal of the said association that the County Commissioners unite with said association in the erection of a Monumental Building in the city of Zanesville, by the purchase or lease of the real estate now in possession of the Ladies of quiet Association, and the erection upon said real estate of a Monumental Building for said association, and also of an attorney for the county, as authorized by an act of the General Assembly of Ohio, passed March 11, 1887, amending an act for the same purpose passed January 26, 1887, a certified copy of which amended act was furnished the Board by said committee.

After an examination of said act, passed March 11, 1887, and a full consideration of the relations of ownership and occupancy in control that the County and the said association would respectively have toward said building after the County should be at the expense of its erection, the Board deferred taking any action on said proposal, and laid the cards on the table, until such time as the matter can be more fully considered and matured.

Hudson County, Ohio,
Jackson, Wednesday, March 23, 1887.

The Board of County Commissioners met this day pursuant to adjournment.

Present: Messrs. Athol, Coleman, and Deer.

Relief of the Hudson County Agricultural Society.

In the matter of the proposed mortgage to John H. King, etc., of the Hudson County Agricultural Society to secure a loan of Eight Thousand Dollars ($8,000) from John N. King, etc., to the said Agricultural Society at 8 percent per annum interest, for the purpose of paying the debts of said Society, the said loan and mortgage having been submitted to the Board of County Commissioners for their consent and approval thereof, it was this day determined by the Board for the reason that the authority in the bill introduced in the Legislature for the relief of said Society was for the purpose of paying the amount of the principal and accrued interest of a bond, and mortgage given on the proceeds by the said Society to the amount of Fifty Thousand Dollars ($50,000) and did not propose to authorize the levy of a special tax (2% of one mill) to raise an amount larger than necessary to pay the indebtedness on said loan and satisfy said mortgage and also for the reason that said levy could not be legally made and anticipated before the June elections of the Board; that the proposed new loan and mortgage cannot be entertained and approved by the Board until its June session and after the laying of said special tax.

The Board, however, conferred with Mr. Francis Hedge, President of the Union Banking Company, which Company holds the notes and mortgage given by said Agricultural Society to said Bank, and who thereupon agreed to carry the same for said Agricultural Society and the Society of Hudson County to the next
March Session, 1837.

Hearing on the Matter of Monumental Building.

The Board gave a further hearing to Messrs. J. D. Mussey, J. H. Tower, O. C. Young, and others, in advocacy of the erection by the County Commissioners of a Monumental Building in memory of the Soldiers, Sailors, and Soldiers and Sailors of the County, who died in the Union military or naval service during the war of the Rebellion as authorized and empowered by act of the General Assembly of Ohio passed January 26th and March 14th, 1887.

The Board considered and discussed the proposition to erect a Monumental Building under said act, and the interest and title thereto. The County would thereby attain and possess therein. Whether after incurring the expense of purchasing or leasing the ground therefor, and dedicating said Monumental Building, the County could retain an interest therein beyond that of an owner only, as apparently limited in one of said acts, was a question considered by the Board. Each member presented in person his own views and proposition on the subject and thereupon the matter was laid on the table for taking up and considering further at future meetings of the Board.

Draw-span of the Fifth Street Bridge.

The Board inspected and examined the present condition of the draw-span of the Fifth Street Bridge across the Muskingum River, in the city of Zanesville, and found the turning mechanism of the same, in a poor working and possible unsafe condition. The turn-table requires at the force of two men to bend it, and even with that the operation is difficult and tedious. In the process of turning, the said draw-span moves so unevenly that some of its weight falls upon some four or five members of the wheel on the track, and the weight of friction on these four wheels is enough to split and drag them out of place, with a pressure which will even the heaviest and longest metal can withstand.

The County Auditor, as Secretary of the Board, was directed to write to the Columbus Bridge Company, of Dayton, Ohio, stating
Better, as above the present condition of said draw-span, and inquiring of said Company what they can do to put the said draw-span in a satisfactory working order, according to the terms and specifications of their contract for said bridge work.

Release of Mortgage on Mortgage Record.

Application being made this day to the County Commissioners by the parties interested for an entry of satisfaction against the record of a mortgage deed made to the Commissioners of the County and their successors in office, for the security of notes to said Commissioners and their successors in office, to the amount of $500, given by Daniel Allen, October 3, 1869, as part of the consideration of certain real property sold and conveyed by said Commissioners to said Daniel Allen, at said sale; said application being made to the present Commissioners for the reason that the original mortgage, after its return to the mortgagor (the late John Allen deceased), had been lost or misplaced; whereupon the present Commissioners, after examination of the entries pertaining to the matter, being satisfied that full judgment of said note had been made, and that the omission to have the same entered on the record of said mortgage deed in the record of mortgages in the County Recorder's office, had been caused by neglect on the part of the maker of said mortgage deed, and the omission to have such entry made during his lifetime, the present Commissioners proceeded to the County Recorder's office and entered satisfaction in the record of said mortgage deed, as requested of said party by the parties now interested in said real property therein described, on the Record of Mortgages No. 33, page 455. This minute of said transaction is hereby made on this Journal of the proceedings of the County Commissioners by the request of said parties so interested.

Shaw; thence southerly about one hundred feet; thence easterly to the corners of a certain orchard about thirty rods; thence south-easterly to the said grade-road; and the said John D. Shaw, with John Shaw and J. H. Disher, having given bond in the sum of two hundred dollars, to the State of Ohio, for the use of Muskingum County, conditioned for the payment of all costs and expenses occasioned upon said applications in court; the prayer of the petitioners be not granted; the proceeding had in pursuance thereof be not finally affirmed and established; which bond be accepted and approved; and it appearing that said petition is signed by at least twelve freeholders of Muskingum County residing in the vicinity of the proposed alteration of road; and that notice of the filing of said petition has been given according to law:

It is ordered that Stockton Finlay, John Stevens and John Scott, three disinterested freeholders of the County be, and they are hereby appointed Viewers, and Frederick Howell, Suroror, of said alteration of road, and that they meet at the residence of said John D. The matter of the proposed contract by this Board with the Trustees of the Mushinumb County Soldiers and Sodors Monumental Association, this Board of County Commissioners, met this day advised by their county Messrs. H. N. Southard and A. H. Power, that, as they read and understand the law authorizing the erection of a monumental building and pavilion, passed March 11, 1887, (Ohio Rev. St. §47 page 71), the title to the real estate purchased by the County Commissioners, upon which is to be erected a monumental building in honor of the soldiers and sailors from Mushinumb County who lost their lives in the Union service during the late war, should be acquired by and vested in the County Commissioners of Mushinumb County, and that the said building and pavilion be erected by the Board of County Commissioners, as the said law especially provides; whereas the Board of County Commissioners shall, by a written lease or other contract with the said Trustees of the Mushinumb County Soldiers and Sodors Monumental Association, the terms and conditions of which the said Association shall hold and occupy the parts of any such building so erected by the Board of County Commissioners, as here been provided for, and the said building and pavilion purposes—being the same views of the power and functions of the Commissioners under said law as stated by said counsel, by their written opinion furnished to the Commissioners on the 20th day of June, 1887. The said counsel are also of the opinion that the course of proceeding above advised to the Commissioners is preferable to that proposed by said Trustees in the form of contract submitted by them to the Commissioners, by which the title to said real estate would remain in said Trustees, and the latter would erect said building; for the reason that certain questions as to the legal powers of the Commissioners in the matter of the validity of certain contracts heretofore entered into between them and said Trustees, would thus be avoided.

The Board adjourned to tomorrow morning at 8 o'clock.

County Commissioners' Office,

Muskingum County, Ohio,

Zanesville, Wednesday, August 3, 1837:

The Board of County Commissioners met this day pursuant to adjournment. Present: Messrs. Bethel, Colvin and Dee.

Appropriation for Repair of Road:

The Board made an appropriation of fifty dollars ($50), out of the Road Fund, for the repair of the County road on Blue Rock Run, Harrison Township. The said appropriation to be expended under the direction of Commissioner Bethel. Ages: Messrs. Bethel, Colvin and Dee.

Minor Contract Reported, Adopted and Approved:

Mr. Bethel reported a contract with Robert Keys for the masonry of two culverts on the County road from Zanesville to Madison, near the residence of Robert McCracken, estimated to contain about seventy (70) pieces of masonry, to be paid for at the rate of four dollars ($4) per piece. The said contract was thereupon adopted and adopted. Ages: Messrs. Bethel, Colvin and Dee.

Bethel to J. A. R. Riggs Co.

Concerning Road and Harrow:

The Board directed its Secretary to address a communication in the name of the Board, to the officers and managers of the Zanesville and Ohio River Railway Company, stating that said Company had taken possession, and reception of several hundred feet of the County road, or a great partition thereof, at a point on the west bank of the Muskingum river, near the guard-gate at the entrance to the canal at Taylorville, said point being...
August 3rd, 1887.

generally known as The Narrows, on account of the narrowness of the County road through Chou, said piece of road, before being seized and secured as aforesaid by the said Zanesville and Ohio River Railway Company, had been widened sufficiently to accommodate the traveling public at great expense to the County; these having been suspended at one time I am cutting down the side of the hill and widening said road, the sum of thirty-five hundred dollars ($2500).

The said Zanesville and Ohio River Railway Company, in the construction of its track all said piece, has reduced the County road to a very narrow width. And the result of it is that, the railroad being higher than and above the County road, the water from the hill runs into and seeps the County road and lies hereon. As there is no drainage or other way for the water to run off, if the said piece of road is not repaired in season, it will be impossible to travel over it during the winter months. The members of this Board think that said piece of road should be drained by placing sewer pipes, drain tiles or culverts under the Railroad tracks, and then filling up the same.

This Board, at or during its sessions, in September (next month), would be pleased to confer with the representatives of said Z.R.R. Co., for the purpose of making an arrangement to provide for the repair and protection of said piece of County road. And this Board do not want the matter deferred beyond that leaves as the work required should be done—so that the road may become compact before the fall rains set in.

COUNTY COMMISSIONERS

Hudson County Office

Janesville, Tuesday, August 16, 1881.

The Board of County Commissioners met this day, pursuant to adjournment. Present:

Misses: Adlitz, Delin, and Beck.

The legal counsel of the County Commissioners this day furnished the Board with a form of contract between the Board of County Commissioners and the Board of Trustees of the Hudson County Soldiers and Sailors Monumental Association, for the purchase of the real estate in the city of Janesville now held by said Trustees, and the erection upon said real estate, by said Commissioners, of a building suitable for Soldiers and Sailors Monumental Building, as well as an Armory, and thereupon the subsequent lease by said Commissioners to said Trustees of all of said Building and premises, for the term of ninety-nine years, except that part or portion of said Building and real estate devoted to Armory purposes as shown upon the plans adopted for the erection of said Building.

It is stipulated in said form of contract that the said Commissioners shall assume and pay off a mortgage upon said premises as to be purchased, as aforesaid, amounting to $19,000, and cause the land of the County to be assessed for the sum of $15,000, payable in twenty years, bearing 4% per cent. interest, payable semi-annually.

The said Trustees, in consideration of the terms set forth by said Commissioners, to pay to the latter and their Successors the said $25,000, if bonded indebtedness, together with the 4% per cent. semi-annual interest thereon, as and at the times the same respectively shall become due and payable. The indebtedness of said lease to be so conditioned as to give to said Commissioners a first lien paramount to all others, that when said Trustees and their successors have paid said bonded indebtedness and the interest thereon and performed the covenants of said indenture in their part, the said Commissioners shall, on demand of said
August 16th, 1887.

Instead, convey said premises to said Trustees, their successors and assigns, by a good and sufficient deed, and, upon being legally authorized to do so, convey and, also, that if during said lease or demise said Trustees shall fail to pay or cause to be paid, said bonded indebtedness, together with the interest thereon, as and when the same becomes due and payable, and the same or any part thereof shall be in arrears and unpaid for the space of one year after the same shall have become due and payable, and for a period of four months after notice of such default, or if the said Trustees shall fail to pay and perform the other covenants and agreements of said indenture on their part, then the said mortgage shall cease, determine, and re-vest as soon as the first party shall so elect and by a resolution before a foreclosures of the same, and immediately thereafter it shall be lawful for said first party or their successors, be sold upon said premises,文书 and to possess and occupy the same, and though said demise had not been made, and also that said Commissioners and their successors will covenant and agree with said Trustees, their successors and assigns, that, upon the performance of the covenants of said lease, they shall peacefully and quietly have and enjoy the premises hereby as before and during the full term described.

Said council stated their opinion to be that such a form of contract, the details of which to be subject to the laws and agreements of said two Boards would affect the objects and purposes of the said two Boards under the law governing them in the matter of the erection of said Building.

The said form of contract was therefore laid on the table for advice, and to confer thereon with the said Trustees of the Washington County Soldiers and Sailors Monument Association.

Office of County Commissioners,
Jenningsville, Mahoning county, Ohio,
Monday, September 12, 1887.

The board of county commissioners met this day pursuant to adjournment.
Present, Meese, Bethel, Colvin, and Leg.

Detection of Oak Creek or West Carrollton &

n agreement of the board, proceeded this day to Oak Creek or West Carrollton and made an examination of the condition of the county road leading from Greeson to West Carrollton (said road is over 60 feet wide). Many citizens having complained recently that a portion of said road had been neglected and obstructed against public travel by the Cleveland, Akron, and Columbus railway company for the use of its tracks and road bed.

Upon return from said examination, the committee reported that they found that portion of said Oak Creek or West Carrollton road from the bridge in the same across the Ohio canal, about two miles north of Greeson, to the junction of said road with the Indian Ridge road and below practically occupied by said Cleveland, Akron, and Columbus railway company and its use as a public highway was obstructed and destroyed; also that the line of said Cleveland, Akron, and Columbus railway had been relocated from within said points of the same as originally projected and shown and, also, appears on a plat filed with the county commissioners with the letter of date March 7, 1887, by A. W. Meek, agent of Cleveland, Akron, and Columbus railway company.

Be it therefore enacted that above the line of said railway not crossing the said public road only once between said points, the line of said railway is now located and actually moved crossing the said public road in such a manner and to such an extent as to prevent its use by the public contrary to law and to representations of said agent, and made to the board in March, 1887.
September 13, 1867.

Said committee also reported to the board that the space of ground between the Ohio Canal, along the south line of said public road, and the elevated ridge on the north line of the same, was so narrow and contracted as to exclude the location and construction of a new piece of public road in place of that proposed by said railway companies, and that the location and construction of such new piece of public road north and south of the said Ohio Canal thereon would be impracticable, by reason of the marshy nature of the ground. And further, that the aforesaid project had destroyed the use and convenience of the public interest to the extent of thousands of dollars. Said report was adopted by the board. Whereupon the board adjourned to meet at 3 o'clock A.M., Tuesday, September 13, 1867.

September 13, 1887.

The trustees of the monument association, this day, delivered to the board of county commissioners a deed of the property on North Fifth Street, Janesville, Ohio, held by said trustees. The deed being satisfactory to said board of county commissioners and their attorneys, was accepted and left at the office of county recorder for record.

On motion of Mr. Belvoir, it was decided to advertise for proposals to build a memorial library building, also to instruct the county auditor to furnish to each of four Janesville papers, The Courier, The Ledger, Janesville Record, and Post, a copy of advertisement, inviting bids for the erection and completion of such building according to plan and specifications, prepared by H. Your committee, called at the office of Board of Public Works on Tuesday, the 21st inst., and will not find said board in session. Mr. Samuel Backelet, state engineer, and was informed that said Board of Public Works would require of the county commissioners a survey and plan of the surroundings of that part of the Ohio River in need of bridge work, sought to be abandoned, the places of crossing the canal, width of water, width of tow-path, length of road along tow-path, kind of bridge to be built, whether one or two-rail, or stone, kind of foundation whether tile or stone. Said Samuel Backelet further stated, as his opinion, that for a draw bridge, five feet foundation, the Board of Public Works would require, but if eighteen feet foundation, a draw bridge, five feet foundation, a draw bridge, five feet foundation. For a stone draw bridge, the full width of water, that, as the Board of Public Works had passed a resolution adopting the Smith Bridge Company's self closing draw bridge, such as now no one of resistance. They would give a self closing draw bridge.

Said Samuel Backelet stated that the Columbian Bridge Company had constructed a similar bridge at Kinzett, Ohio, that was expected to last that place in a short time, and would report to the Board of County Commissioners,

Report of Committee on Copying, etc., at Recorder's Office.

December 17, 1883.

Sirs, we have been authorized by your Honorable Board to examine and select upon the work of copying the old and duplicate records in the county recorder's office now in progress, beg leave to report:

We have carefully examined the work so far done. We find the tracing of the plates so far as we could observe to have been done, but the lettering, figures, and written matter to be very poorly done, and not at all in keeping with the style and method used in all such work likely to be performed. The plates should all be neatly named, the book gaged, and a good index of the book made. Unless this is done, the work is not valuable for reference, and this latter work we should think, from the understanding we have, from your Board, of the contract for the whole, should be performed as part of the contract, and so required by your Board. We also desire that the work now behind be stopped until your Board, by a more reasonable contract, and more suitable and settled plans be adopted, can intelligently proceed with the work. Such a work should be best and attractive, and conform with modern ideas. We believe that the commissioners can not be too careful in their supervision to preserve the county records. Yet all work done in that line should follow a systematic and comprehensible plan which should be submitted to your Board in writing before the work is ordered.

Respectfully submitted,

Respectfully, Engineer's report of Monroe Street and Broadbridge Bridges considered.

The engineer states, in his plan and specifications for the infrastructure of the Monroe Street and Broadbridge bridges having been submitted, a copy of which is now enclosed, the board again authorized the bids together with the said report, but made no award.

Gainsville, Ohio, September 25, 1837.

To the Honorable County Commissioners
of Mecklenburg County, Ohio:

Gentlemen,

I submit the following report on the plans, section diagrams, and specifications for the infrastructure of the Monroe Street bridge which your board have submitted to me for examination.

In the first place, I will state an axiom in bridge construction, viz., that the strength of a bridge is the sum total of its weakest part. An example. If a bridge has the capacity to hold a load of 500 tons at all points except one and that point will only sustain 480 tons, then the capacity of the bridge is only 480 tons, more or less.

The different plans submitted by the various bridge companies, the first one examined was the Columbia Bridge Co. of Dayton, O. The plans, division diagrams, and specifications are for an iron bridge with iron floor joists. I found no errors in the division diagrams, and no errors in the size of the different members designed according to Libby's specifications for bridge having a capacity of 100 ft per sq ft, including side walls. I could see that I believe the plans submitted are fully up to the specifications.

The next one is from the same company and proposed specifications submitted by Mr. Washington Creo, their division diagram has losses in which the engineer admitted that a school boy ought to see. For instance, in one of the suspended they give the weight sustained to be 1800#. When actually it is 4000#.
And they give the section used as 1.32". Now it should be 32" inches, so that the plane submitted are not up to the specifications.

The next plan they submitted was H.G. Schuyler's. It was not able to make much out of it and I could not tell whether the strain diagram was made out in paper, minute, or fact. The planes are far worse adjusted, and further, the bridge is set a bridge about 2 feet long, when the bridge will come to the 80 foot long, or about 6 feet longer than specified. Also, the stress not set under what specifications he will build the bridge.

The next plan before us was the Wright-Evans Bridge Co. of Canton. They submit a plan and strain diagrams, and Good's Specifications. The 160 foot spans are both trusses and the long span is covered with a three or 4 inch of load. Their strain diagrams are to the specifications submitted no regard to the structure. There is some objection to the number of construction of the trusses. For instance, in the 3rd part they place a strut which is a compression member which meets the end not in the centre of the trusses. The strut carries the stress in a way that tends to bend the centre of the truss upward. The cover plate on the top of the jetting a joint, directly over the joint of intersection. The plate on the lower half of the jetting 1/2 inch thick and on the upper half is 1/4 inch thick, so that there would have been a sudden increase of thickness not being the plate could be cut, so that the splice plate would be flat on the cover plates.

Mr. C. G. French of Bridge Steel Co. of Bridge Co. says 10th of the sectional of the truss come with the time without buckling, strain being reached nearer than a factor of 4th. But the deflection will be too great. They submit their plans under Groce's specifications.

Groce's Specifications, Sec. 24, says the floor trusses need no longitudinal girder shall have, preferably, a depth of not less than 3/4 of the span, the span is about 14 feet, so that the joints should have a depth of about 16 inches so as to make the floor sufficiently rigid. According to their plans, the bridge would have a depth of 92 feet long, or 9 feet longer than the specified length. The depths of joints or girders see Bridge or Trains, p. 227.

The next plan examined was submitted by Smith Bridge Co. I find in the strain diagram of the 160 foot span they have a strain of 274,000 on both
September 21, 1857.

Upon the reports made, they have given the same strain as 264,000 in square numbers. They have given the column required as 17 inches, when it requires 18½ inches to stand the strain for a capacity of 100#. per sq. ft. The floor joints have a depth of 7½-8½ inches. I think the road should be 18 inches, according to the Buss, to result the vibrating motion of a load passing over the floor. They do not state, nor leave any diagram or plans whose specifications they propose to follow. Their own guard mentioned the size of the frame sheets. This there is a difference in our figures on this point, I refer you to the scale Bridge with 6½ ft. span, i.e. 7½ ft. reference to embed a floor size of which the wrought iron of Canton and the Smith Bridge are 5½ ft.

The next instead, is the Penn Bridge, I do not go through all the frame sheets. I found them correct as far as I went, I have the same objection to the joints as in the Smith Bridge. They are the same depth of 7½-8½ inches. The proportions reduced say 9½ sq. in. in steel will be used less than 7½ sq. in. the two of the steel joints are only 2½ ft. each side, and weigh 16½# per foot. The weight of the joint case for all these specifications would be 9½ sq. weight or a shortage of the 7½ sq. foot which is about 6½ per cent short. All the above is respectfully submitted.

J. E. Gunnell, Engineer.

Ganymede, Ohio, April 29, 1879.

W. H. Merrill, Lieut Col. Engineers:

Dear Sir,

Your communication of the 10th inst. at hand. In action by this Board with regard to the alteration of the Fifth Street and Main Street bridges of this city, had not yet been. The commissioners are of the opinion that the government, in accepting the Muskingum River improvement from the State of Ohio, virtually assumed to provide for navigation of the Muskingum River at its pleasure. The chartes of the county show that the Main Street draw was constructed at the expense of the state, by order of the board of public works, under the supervision of the state engineer. When the county first constructed the said bridge, over the river of the Muskingum for the benefit of the county, it will do so in conformity with the requirements of the government. The scheme above cited this point deeming it wise to take any steps whatever toward removing the Main Street draw so as to lessen the obstruction to navigation.

Respectfully,

The parties, being desirous of amending the conditions of the marriage contract or of settling any other matters connected with the marriage, may, by mutual agreement, make application for the establishment of a marriage board or a similar body. It is to be noted that any such application must be made by both parties and the board must consist of three members. The parties may then come together in the presence of the board and conclude the marriage according to law.

In the case of marriage by consent, the consent of both parties must be obtained. The marriage must be solemnized before a marriage registrar or a similar official. The parties must be present and must declare their willingness to marry. The registrar must then issue a certificate of marriage, which is a legal document attesting to the union of the couple and the legality of the marriage. The certificate must be filed with the registrar to complete the registration of the marriage.

The marriage is considered to be binding from the date of the ceremony, and the couple must live together as man and wife. Any disputes or differences that may arise can be settled through legal means, such as a divorce or annulment, depending on the circumstances.

In the case of marriage by proxy, the proxy must be present in the presence of a witness. The proxy must declare the willingness of the person they are representing to marry. The witness must then attest to the validity of the marriage. The marriage certificate must be filed with the registrar to complete the registration of the marriage.

The marriage is considered to be binding from the date of the ceremony, and the couple must live together as man and wife. Any disputes or differences that may arise can be settled through legal means, such as a divorce or annulment, depending on the circumstances.

In the case of marriage by arrangement, the parties must agree to the terms and conditions of the marriage contract. The contract must be signed by both parties and witnessed by a legal official. The contract must then be filed with the registrar to complete the registration of the marriage.

The marriage is considered to be binding from the date of the ceremony, and the couple must live together as man and wife. Any disputes or differences that may arise can be settled through legal means, such as a divorce or annulment, depending on the circumstances.

Communication of Assistant Engineer Messer, relative to plans of Old Fifth St. Bridge.

The following letter from
Edmund Messer, Assistant Engineer, was received and entered on the Journal: The Commissioners of Washington County, Lanham, Ohio.

Gentlemen:

In compliance with your request, I have made an examination of the river at site of old Fifth St. bridge. The stone and foundations of the piers were removed to the required depth, and the excavation of the piers on the right side of channel, where a depth of 2' 6" and a foot below pool level, was found at two points. As this pier is at the channel, being directly above the right-hand channel pier of the new bridge, further excavation will not be necessary.

Very respectfully,

Edmund Messer, Assistant Engineer.
